(54) Title: TOY VEHICLE

(57) **Abstract:** The invention provides a toy vehicle comprising sound-producing means (2) arranged to replay recorded sounds and means (4) for activating the sound-producing means depending on the motion of the vehicle. In a particular embodiment, a first sound (9), such as a sample from a recording of music, is emitted if the vehicle is moved forwards and a second sound (10) is emitted if the vehicle is moved backwards. Thus an effect similar to the "scratching" of a vinyl record by moving the record back and forth on a record player is obtained.
